

CASA COLINA RESEARCH INSTITUTE

# TRANSFER OF SPATIAL NEGLECT

A study of awareness for left hemispatial neglect

Who is eligible to participate?

- Subjects over 18 years old with acquired brain injury (i.e., stroke and traumatic brain injury) that have been diagnosed with hemi-spatial neglect.
- 3 weeks post onset.
- Currently demonstrate symptoms of clinical levels of spatial neglect.

Subjects will be shown simple visual stimuli including dots, shapes, and cartoon faces. Subjects will be asked to perform a discrimination or detection task and report by key press. This testing session will take no longer than 1 hour.
