

Spinal Cord Injury Return-to-Work Training Study

What is the purpose of this study?

The Casa Colina Spinal Cord Injury Return-to-Work Training Study provides training opportunities and support services in a safe learning environment for individuals with spinal cord injury. The goal of the study is to help these individuals obtain gainful employment and re-integrate into their community.

What is involved with participation in this study?

- Participants undergo a total of 200 hours of training at Casa Colina Hospital and Centers for Healthcare over a three-month period.
- Participants receive individualized job training, vocational navigation, and support in returning to work.
- Participants receive a stipend for the completion of hours.

Who is eligible to apply for the study?

- Any individuals who have experienced a spinal cord injury and desire to return to work.
- Participants must complete volunteer training and screening.
- Please apply ASAP. The application deadline is Friday, March 13, 2020.
