

INFANT RESEARCH STUDY

We're doing something incredibly special!!

OUR
GROUNDBREAKING
STUDY IS **THE FIRST
IN THE WORLD**
TO IMAGE A BABY'S
BRAIN WHILE THEY
ARE AWAKE AND
ALERT, **USING
COMPLETELY SAFE
ULTRASOUND
TECHNOLOGY.**

**Together, we can create a
brighter, healthier future for
countless children.**

The Casa Colina Research team is capturing the world's first, safe, gentle ultrasound pictures of babies' brains while they're awake, happy, and exploring the world. By joining us, your family can help doctors collect data to understand early developmental risks like never before.

Join our Brain Imaging Study:

Earn \$50	Leave a legacy far beyond your own family
Babies must be 5-9 months old	The visit takes approximately 1 hour at our Pomona clinic
