

# DO YOU HAVE ARM WEAKNESS FOLLOWING A STROKE?

This clinical trial offers extra rehabilitation therapy to people who have arm weakness due to a stroke in the last **3-5 months**.

## WHY BE PART OF THIS TRIAL?

### **RECEIVE ADDITIONAL, AT-HOME THERAPY**

Participants will be randomly assigned to one of two groups:

- [1] Usual care alone, or
- [2] Usual care plus extra arm movement therapy delivered through a telerehabilitation system provided for use in your home.

If you are assigned to the usual care alone group, you will have the opportunity to receive the additional at-home therapy after the study is complete.

### **NO COST TO PARTICIPATE**

All therapy provided during the study is completely free — there is no charge to you or your insurance. Participants who complete the study will also receive \$150. Transportation can be provided, if necessary.

### **WANT TO LEARN MORE?**

Contact **Dionne Barajas** and ask about the **TR-2 Trial**.

 **909/402-2811**
